Ring Information

Jostens Payment Plan: \$50 deposit due at time of order. Balance billed in 4 equal monthly installments. A \$15 holding fee will be added to invoice. Ring production begins once 75% of the balance due is paid and generally takes 6 weeks (production time varies). Ring ships only if paid in full. NOTE: Balance due may be paid in full at any time during the installment process (\$15 holding fee will still be applied).

What are the different metal choices?

Jostens offers a variety of metal choices including white and yellow gold, Silver Elite®, Solaris Elite™, and Lustrium®.

- Gold** - Jostens offers gold in 2 colors and 3 karat qualities:

 - Yellow Gold** - Because of its durability and lasting value over time, gold is a wise investment. Gold has been the standard for jewelry for over 4000 years.
 - White Gold** - Has the same lasting qualities and value as yellow gold, but is composed of a different metal.

Metal Purities

 - 18K:** - 75% pure gold, 25% metal alloy.
 - 14K:** - 58.5% pure gold, 41.5% metal alloy.
 - 10K:** - 41.7% pure gold, 58.3% metal alloy.
- Solaris Elite™** - This radiant yellow 6K metal alloy is beautiful and affordable. We've combined durability and affordability to create our exclusive yellow 6K alloy.
- Silver Elite®** - A precious metal alloy primarily composed of silver with elements of palladium and gold, coated with a rhodium plating.

Rhodium Plating - A member of the Platinum metals group. Rhodium is a silvery, metallic colored precious metal. It is an extremely hard material and is highly resistant to corrosion and it is used extensively in the fine jewelry industry. Rhodium provides protection for Silver Elite®, coating it to help prevent tarnish and scratches. It is very durable and prevents skin oil from dulling the ring. Rhodium is most commonly plated on white gold and sterling silver jewelry.
- Lustrium®** - A non-precious metal alloy that is silver in color. It is a hard and durable metal. Lustrium will react to oxygen and thus may require additional care and [cleaning](#).

*Nickel is included in the following metal mixes: Lustrium® and all white gold.
